

AIRLINE LOSSES:

COLUMN	DESCRIPTION	DATA CLEANING
airline	Inadequate sample size but could be used in joins Unique ID	
country	48 distinct countries	
airline_type	Cargo, flag carrier, low cost, private	
estimated_loss_usd		convert to number data type
cancellations_count		convert to number data type
reroutes_count		convert to number data type
revenue_loss_pct	Junk column	
region	7 unique regions	

AIRLINE LOSSES ESTIMATE:

COLUMNS	DESCRIPTION	DATA CLEANING
airline	inadequate sample size but could be used in joins Unique ID	
country	29 distinct countries	
estimated_daily_loss_usd		convert to number data type
cancelled_flights		convert to number data type
rerouted_flights		convert to number data type
additional_fuel_cost_usd		convert to number data type
passengers_impacted		convert to number data type

AIRPORT DISRUPTIONS:

COLUMN	DESCRIPTION	DATA CLEANING
airport_name	55 distinct airports	
iata_code	55 distinct airports	
country	44 distinct country	
region	8 distinct regions	
disruption_type	11 disruption types	
severity_level	critical, high, low, moderate, severe	
flights_affected		convert to number data type
duration_hours		convert to number data type
date		convert to date

AIRSPACE CLOSURES:

COLUMNS	DESCRIPTION	DATA CLEANING
country	25 distinct countries	
region	6 regions	
closure_start_date	contains both start date and time of closure	need to segregate date and time in different columns and then convert to the respective data type
closure_end_date	contains both end date and time of closure	need to segregate date and time in different columns and then convert to the respective data type
duration_hours		convert to number
airspace_zone	7 airspace zones	
reason	can be used in extended filter	need to remove "â€" in whole document
flights_affected		convert to number

CONFLICT EVENTS:

COLUMNS	DESCRIPTION	DATA CLEANING
date		convert to date
event_type	10 distinct events	
event_description	can be used as an extended information using filters in dashboard	need to remove "â€" in whole document
location	contains state and country both in the same column	need to remove "â€" in whole document; segregate state and country in diff columns using delimiter
severity	5 distinct severity	
aviation_impact	can be used as an extended information using filters in dashboard	need to remove "â€" in whole document

FLIGHT CANCELLATIONS:

COLUMNS	DESCRIPTION	DATA CLEANING
date		convert to date
airline	70 DISTINCT airlines	
flight_number	can be used in extra filters description	
origin	54 distinct states	SÃ£o Paulo, BogotÃ¡ need to be cleaned
destination	54 distinct states	SÃ£o Paulo, BogotÃ¡ need to be cleaned
origin_country	43 distinct countries	
destination_country	43 distinct countries	
origin_region	8 distinct regions	
destination_region	8 distinct regions	
aircraft_type	12 aircraft type	convert to text
passengers_affected		convert to number
reason		need to remove "â€" in whole document

FLIGHT REROUTES:

COLUMNS	DESCRIPTION	DATA CLEANING
date		convert to date
airline	70 distinct airlines	
flight_number	sample size inadequate	
origin	54 distinct states	SÃ£o Paulo, BogotÃ¡ need to be cleaned
destination	54 distinct states	SÃ£o Paulo, BogotÃ¡ need to be cleaned
origin_country	43 distinct countries	
destination_country	43 distinct countries	
origin_region	8 distinct regions	
destination_region	8 distinct regions	
original_route	7 distinct routes	
new_route	8 distinct routes	need to remove "â€" in whole document
original_distance_km		convert to number
new_distance_km		convert to number
additional_distance_km		convert to number
extra_fuel_cost_usd		convert to currency usd and equal decimal spaces
delay_hours	no of hours the flight is delayed	convert to equal decimal spaces
